

CTA Audit Report – PartsSource Platform

Naming Best Practices (Audit Foundation)

Button Labeling: Why “Verb–Subject” Wins UX Gold

When naming buttons, stick with the Verb–Subject format—like “Download Report” or “Submit Form.” This follows a Presentation Sequence (PS) pattern, where users first see what action they’ll take, then what it affects. It mirrors natural language and mental models, reducing cognitive load (Hick’s Law) and accelerating recognition over recall (Jakob’s Law).

Why it works:

- Action-oriented: Verbs prime users for interaction.
- Predictable: Aligns with user expectations across web and mobile UI.
- Scannable: Clear actions make buttons more glanceable and tappable (Fitts’s Law).
- Consistent: Ensures uniformity in CTAs, improving usability and flow.

Avoid vague nouns like “Report” or “Form.” Always lead with the doing, then follow with the thing. Users want to know what happens before they commit.

Button Labeling Rules (Quick Reference)

- Use “**View Details**” when the action opens a single item or record (card → detail)
- Use “**View All + [Object]**” when the action navigates to a full list or collection (section → list)
- Use “**Verb + Object**” (e.g., “Submit Work Order”, “Approve Event”) for workflow or task-based actions

Screens Included in This Audit

The following screens were reviewed and are referenced throughout this report:

1. [Command Center](#)
2. [My Lists \(Selected\)](#)
3. [My Dashboard \(OneView\)](#)
4. [My Dashboard \(OneView\) – Asset Detail Page](#)
5. [Asset Explorer \(Asset Uptime\)](#)
6. [Asset Explorer – Detail Card \(Modal\)](#)
7. [Visual Analytics – Dashboard](#)

8. [Visual Analytics – Total Spend](#)
 9. [Parts Quotes – List](#)
 10. [Part Quote Detail Page](#)
 11. [Approvals \(Card View\)](#)
 12. [Exchanges and Returns \(Card View\)](#)
-

Screen 1: Command Center

Overview

- This is a primary landing dashboard that provides instant visibility across the PartsSource ecosystem, enabling users to manage day-to-day operations from a single interface.
- It centralizes real-time, actionable data across orders, assets, parts, and services, reducing reliance on dispersed systems and improving operational awareness.
- The dashboard supports prioritization and rapid response by surfacing open actions, status updates, and exceptions that may impact equipment uptime and clinical availability.

CTA Audit Table – Command Center

Current CTA (Exact)	CTA Type	Context	Issues	Recommendation	Proposed Label
Clear Filters	Secondary action button	Displayed within a filtered results view	None identified	Keep	Clear Filters
View Event Details	Primary action button (navigation / disclosure)	Displayed on top Events	Minor redundancy. “Details” already implies viewing	Simplify	View Details
View Details	Primary action button (navigation)	displayed on card view at bottom	none	keep	View Details

	n / disclosure)	once item is selected			
--	--------------------	--------------------------	--	--	--

[Table of Contents](#)

CTA Notes – Command Center

- CTAs on this screen are primarily **orientation and navigation**, not commitment actions.
- No CTA copy changes are proposed for this screen under current scope.

Screen 2: My List (Selected)

Overview

- This screen represents an organized grouping of items created by customers to support repeat purchasing and faster order placement, consistent with ecommerce best practices for saved lists and reordering. All buttons shown (e.g., ADD TO CART, BUY THIS LIST) are primary CTAs that directly affect order placement or item removal, and the screen supports both list management (adding, removing, and organizing items) and order initiation (adding items or lists to the cart).

CTA Audit Table – My Lists

Current CT (Exact)	CTA Type	Context	Issues	Recommendation	Proposed Label
ADD TO CART	Actionable	Item card	Clear and consistent	No change needed	Add to Cart
BUY THIS LIST	Actionable	List header	Behavior unclear (cart vs checkout)	Match actual behavior	Buy All (#)
REMOVE ITEM	Actionable (Destructive)	Item row	Low emphasis	keep	Remove Item

SHARE LIST	Actionable	List header	Destination unclear — clarify	keep	Share List
DELETE LIST	Actionable (Destructive)	List header	Clear	Keep	Delete List

CTAs shown when the user selects “Remove Item”

Current CT (Exact)	CTA Type	Context	Issues	Recommendation	Proposed Label
Update List	Destructive secondary action	Displayed in a confirmation modal	Destination unclear — clarify	Use an explicit Verb–Object label that reflects item-level removal	Remove item
Cancel	Secondary action button (escape / abort)	Displayed in a confirmation modal	None identified	keep	Cancel

[Table of Contents](#)

Screen 3: My Dashboard (OneView)

Overview

- This screen serves as a unified entry point and one-stop dashboard that consolidates open actionable items, preferred and pending actions, and status updates for orders and assets. It brings together digital procurement, service management, and operational workflows into a single experience, reducing context switching and simplifying how users move through their

day-to-day work. By centralizing access to priority tasks and updates, the experience reduces cognitive load and improves wayfinding, while consistent patterns and language across features improve learnability and predictability. Overall, the dashboard supports rapid task completion by surfacing relevant actions and updates in one place and reflects the ONE PartsSource initiative's goal of breaking down silos to deliver a cohesive, customer-centric platform.

CTA Audit Table – My Dashboard

Current CTA (Exact)	CTA Type	Context	Issues	Recommendation	Proposed Label
Add a Filter	Step	Page header	Generic	Clarify scope	Add Filter
See More	Step	Section headers	Ambiguous	Make outcome explicit	View Details View All Events
Open Calendar	Step	Right Rail	—	Keep	Open Calendar
Show All Cards	Step	Section headers	Ambiguous	Make outcome explicit	Show All
Show / Hide Tiles	Step	Section headers	Expand/collapse unclear	Clarify expand and collapse states (dynamic)	Expand View / Collapse View
View Details	Actionable	Asset Inventory cards	Approved exception	Keep	View Details
View Details	Actionable	Critical Events	Approved exception	Keep	View Details

		Update cards			
Expand to View All	Step	Critical Events Updates accordion	Ambiguous expand action	Make outcome explicit	Expand View / Collapse View
Nudge	Actionable	Event cards	—	Keep	Nudge
Print Label	Actionable	Actionable Events Update cards	—	Keep	Print Label
Enter PO#	Actionable	Actionable Events Update cards	Symbol in label	Make object explicit	Enter PO
Approve Event	Actionable	Actionable Events Update cards	—	Keep	Approve Event
Submit Work Order	Actionable	Actionable Events Update cards	—	Keep	Submit Work Order
Continue to Checkout	Actionable	Quotes widget	Commitment not explicit	Clarify action	Review Order
Clear Filters	Step	Table	—	Keep	Clear Filters

[Table of Contents](#)

Screen 3a: Saved Filters Modal

Overview

- Modal for managing and applying saved filters within My Dashboard (OneView), allowing users to customize their view by saving, reusing, and applying preferred filter configurations.

CTA Audit Table – Saved Filters Modal

Current CTA (Exact)	CTA Type	Context	Issues	Recommendation	Proposed Label
Set as Default	Actionable	Saved filter row	—	Keep	Set as Default
Edit	Utility	Saved filter row	Approved exception	Keep	Edit
Delete	Actionable (Destructive)	Saved filter row	—	Keep	Delete
Apply Filter	Actionable	Modal footer	Verb–subject compliant	Use plural	Apply Filters
Close (X)	Utility	Modal header	Utility action	Keep	X

[Table of Contents](#)

Screen 3b: Exchanges Past Due – Print Label Modal

Overview

- Modal for selecting exchange items and printing return labels from Actionable Events, enabling users to perform the action of printing labels for multiple actionable events directly from My Dashboard (OneView). This reduces the number of steps required by consolidating actions into a single flow and minimizing navigation and repeated interactions.

CTA Audit Table – Exchanges Past Due Print Label Modal

Current CTA (Exact)	CTA Type	Context	Issues	Recommendation	Proposed Label
View Info	Step	Item row (details)	Detail-view action	Use global detail label	View Details
Print Labels	Actionable	Modal footer (primary)	Verb–subject compliant	Keep	Print Labels
Cancel	Utility	Modal footer	Utility action	Keep	Cancel
Close (X)	Utility	Modal header	Utility action	Keep	X

[Table of Contents](#)

Screen 3c: Exchanges Past Due – Nudge Modal

Overview

- Modal for nudging approvers on past-due exchanges from Actionable Events.

CTA Audit Table – Exchanges Past Due Nudge Modal

Current CTA (Exact)	CTA Type	Context	Issues	Recommendation	Proposed Label
View Info	Step	Order row (details)	Detail-view action	Use global detail label	View Details
Nudge	Actionable	Order row (action)	—	Keep	Nudge
Close (X)	Utility	Modal header	Utility action	Keep	X

Screen 3d: Awaiting Approval Modal

Overview

- Modal for taking approval actions on awaiting-approval events.

CTA Audit Table – Awaiting Approval Modal

Current CTA (Exact)	CTA Type	Context	Issues	Recommendation	Proposed Label
View Info	Step	Event rows (details)	Detail-view action	Use global detail label	View Details
Load More	Step	Section footer	Verb–subject compliant	Keep	Load More
Reject	Actionable (Destructive)	Approve Event section	Verb-only; unclear object	keep	Reject
Nudge Approver	Step	in Needs Nudge Approved section	Redundant	Simplify	Nudge
Approve Event	Actionable	Approve Event section	Verb–subject compliant	Simplify	Approve
Reject	Actionable (Destructive)	Purchase section	Verb-only; unclear object	keep	Reject
Add to Cart	Actionable	Purchase section	Verb–subject compliant	Keep	Add to Cart

Close (X)	Utility	Modal header	Utility action	Keep	X
-----------	---------	--------------	----------------	------	---

- Short CTAs like **“Submit”**, **“Save”**, or **“Done”** are industry standard.

[Table of Contents](#)

Screen 3e: Awaiting Approval Modal - Multi Buying Options

Overview

- This modal is part of the Awaiting Approval flow. This step allows users to select among multiple buying options during approval, enabling side-by-side comparison and informed decision-making without leaving the approval flow.

CTA Audit Table – Awaiting Approval - Multi Buying Options

Current CTA (Exact)	CTA Type	Context	Issues	Recommendation	Proposed Label
Cancel	Utility	Modal footer	Utility action	Keep	Cancel
Reject	Actionable (Destructive)	Modal footer	Verb-only; unclear object	keep	Reject
Continue to Approve Event Event	Actionable	Modal footer (primary)	Verb phrase is long + redundant object	Simplify	Approve
Close (X)	Utility	Modal header	Utility action	Keep	Close

- Short CTAs like **“Submit”**, **“Save”**, or **“Done”** are industry standard.

[Table of Contents](#)

Screen 3f: Awaiting Approval – Reject Quotes

Overview

- Modal for rejecting quotes during the approval flow, allowing users to take decisive action directly from My Dashboard (OneView) without navigating away.

CTA Audit Table – Awaiting Approval - Reject Quotes

Current CTA (Exact)	CTA Type	Context	Issues	Recommendation	Proposed Label
Cancel	Utility	Modal footer	Utility action	Keep	Cancel
Reject	Actionable (Destructive)	Modal content	Destructive action	Keep	Reject
Close (X)	Utility	Modal header	Utility action	Keep	x

- Short CTAs like **“Submit”**, **“Save”**, or **“Done”** are industry standard.

[Table of Contents](#)

Screen 3g: Enter PO# Modal

Overview

- Modal for entering a purchase order number for events, enabling users to complete required data entry directly within the current workflow.

CTA Audit Table – Enter PO# Modal

Current CTA (Exact)	CTA Type	Context	Issues	Recommendation	Proposed Label
Submit	Actionable	Per-event row	Verb-only; object unclear	Keep	Submit

Close (X)	Utility	Modal header	Utility action	Keep	Close
-----------	---------	--------------	----------------	------	-------

- Short CTAs like **“Submit”**, **“Save”**, or **“Done”** are industry standard.

[Table of Contents](#)

Screen 3h: Events Awaiting Approval Modal

Overview

- This modal presents a list of events awaiting work orders, allowing users to review key order and line-item details, select one or more line items, and upload work order documents for the selected items.

Current CTA (Exact)	CTA Type	Context	Issues	Recommendation	Proposed Label
View Info	Step	Event rows (details)	Detail-view action	Use global detail label	View Details
Upload Documents (#)	Actionable	Modal footer (primary)	Verb–subject compliant	Keep	Upload Documents (#)
Cancel	Utility	Modal footer	Utility action	Keep	Cancel
Close (X)	Utility	Modal header	Utility action	Keep	X

[Table of Contents](#)

Screen 3i: Events Awaiting Approval Modal- Submit Work Order Modal

Overview

- Modal for submitting a work order directly from the Events Awaiting Approval flow, allowing users to complete required service actions in context without leaving My Dashboard

(OneView).

CTA Audit Table – Events Awaiting Approval Modal - Submit Work Order Modal

Current CTA (Exact)	CTA Type	Context	Issues	Recommendation	Proposed Label
Click to Upload	Actionable	File upload area	Verb–subject compliant	Keep	Upload Documents
Submit Work Orders	Actionable	Modal footer (primary)	Plural form inconsistent	Simplify	Submit
Cancel	Utility	Modal footer	Utility action	Keep	Cancel
Close (X)	Utility	Modal header	Utility action	Keep	X

- Short CTAs like **“Submit”**, **“Save”**, or **“Done”** are industry standard.

[Table of Contents](#)

Screen 3j: Quote Available Modal

Overview

- Modal listing available quotes with actions to proceed.

CTA Audit Table – Quote Available Modal

Current CTA (Exact)	CTA Type	Context	Issues	Recommendation	Proposed Label
View Info	Step	Quote row (details)	Detail-view action	Use global detail label	View Details

Cancel	Utility	Modal footer	Utility action	Keep	Cancel
Close (X)	Utility	Modal header	Utility action	Keep	X

[Table of Contents](#)

Screen 3k: Quote Available Modal – Select Quote Option

Overview

- Modal for selecting a quote option prior to acceptance, allowing users to review available options in context and proceed with the selected quote without leaving the current workflow, supporting efficient decision-making and reduced navigation.

CTA Audit Table – Quote Available Modal - Select Quote Option

Current CTA (Exact)	CTA Type	Context	Issues	Recommendation	Proposed Label
Reject Quote	Actionable (Destructive)	Modal footer	Verb–subject compliant	Simplify	Reject
Continue to Accept	Actionable	Modal footer (primary)	Verb phrase missing object	Simplify	Accept
Cancel	Utility	Modal footer	Utility action	Keep	Cancel
Close (X)	Utility	Modal header	Utility action	Keep	X

- Short CTAs like **“Submit”**, **“Save”**, or **“Done”** are industry standard.

[Table of Contents](#)

Screen 3l: Quote Available Modal – Asset Information Exchange Program Agreement

Overview

- This step is dynamic and appears only when the user is enabled for exchanges. The modal captures required asset information before proceeding with a quote, allowing users to complete mandatory details in context without leaving the quote flow.

CTA Audit Table – Quote Available Modal - Asset Information Exchange Program Agreement

Current CTA (Exact)	CTA Type	Context	Issues	Recommendation	Proposed Label
Back	Utility	Modal header	Approved exception	Keep	Back
add/edit	Step	Optional Fields link	Abbreviated / unclear action	Make action explicit	Edit
Continue to Accept	Actionable	Modal footer (primary)	Verb–subject compliant	Simplify	Accept
Cancel	Utility	Modal footer	Utility action	Keep	Cancel
Close (X)	Utility	Modal header	Utility action	Keep	X

- Short CTAs like **“Submit”**, **“Save”**, or **“Done”** are industry standard.

[Table of Contents](#)

Screen 4: My Dashboard (OneView) – Asset Detail Page

Overview

- The Asset Details view extends OneView by shifting the experience to an asset-centric focus. Selecting an Asset Details card opens a dedicated view for that asset, where users can see open events, initiate service requests, shop parts, review asset history, access asset-specific communications, and store or reference documentation such as manuals and lifecycle

records. This view serves as a single, centralized workspace for managing everything related to a specific asset.

CTA Audit Table – My Dashboard (OneView) – Asset Detail Page

Current CTA (Exact)	CTA Type	Context	Issues	Recommendation	Proposed Label
View Coverage	Actionable	Asset card (top left)	—	Keep	View Coverage
Request Service	Actionable	Take Action card	—	Keep	Request Service
Order Parts	Actionable	Take Action card	—	Keep	Order Parts
View Details	Actionable	Page sections	none - Approved exception	Keep	View Details
Submit Notes	Actionable	Right rail	—	Simplify	Submit
Submit Documents	Actionable	Right rail	—	Simplify	Submit
Connect My List	Actionable	Right rail	—	Keep	Connect My List

[Table of Contents](#)

Screen 5: Asset Explorer (Asset Uptime)

Overview

- This page addresses the growing complexity of managing large, fragmented clinical asset ecosystems by providing a unified, asset-centric view that consolidates data across devices,

services, and workflows. Healthcare organizations often rely on dozens of disconnected systems to manage thousands of assets from hundreds of manufacturers, which limits visibility and leads to inefficiencies, downtime, and increased costs. By serving as a centralized foundation for asset uptime, this experience harmonizes disparate data sources and surfaces what is happening across the asset lifecycle, enabling teams to make informed, data-driven decisions and manage assets more effectively within a single, integrated workflow.

CTA Audit Table – Asset Explorer (Targeted)

Current CTA (Exact)	CTA Type	Context	Issues	Recommendation	Proposed Label
Card click (implicit)	Actionable	Asset cards	Action not explicit	Keep	Card click (implicit)
Add a Filter	Step	Top filter bar	Verb–object unclear	remove “a”	Add Filter

[Table of Contents](#)

Screen 6: Asset Explorer – Detail Card (Modal)

Overview

- This modal presents a more in-depth view of an asset before navigating to full asset details, allowing users to review asset-specific events, view recently created work orders, and understand current context directly from the asset card.

CTA Audit Table – Asset Explorer Detail Card

Current CTA (Exact)	CTA Type	Context	Issues	Recommendation	Proposed Label
View Details	Actionable	Detail card	Approved exception	Keep	View Details

Share Details	Actionable	Detail card	Approved exception	Keep	Share Details
------------------	------------	-------------	-----------------------	------	------------------

[Table of Contents](#)

Screen 7: Visual Analytics – Dashboard

Overview

- This screen provides a unified view of program performance, bringing together KPIs, trends, benchmarks, and financial data. It allows users to review savings, supplier performance, delivery quality, and supply chain risk, and to compare buying options and identify opportunities for cost savings and improvement. By centralizing these insights, the view supports informed decisions and proactive management of performance and risk.

CTA Audit Table – Visual Analytics Dashboard

Current CTA (Exact)	CTA Type	Context	Issues	Recommendation	Proposed Label
View Details	Step	Data tiles	Approved exception	Keep	View Details
Reorder	Step	Top right (tile controls)	This matches established mental models for drag/drop or sort modes	Keep	Reorder

[Table of Contents](#)

Screen 8: Visual Analytics – Total Spend

Overview

- This screen provides a holistic view of spend and performance, and when users click into any tile from the Visual Analytics Dashboard they are taken to this detailed view, allowing them to pivot from high-level insights to focused analysis with filtering controls.

CTA Audit Table – Visual Analytics Total Spend

Current CTA (Exact)	CTA Type	Context	Issues	Recommendation	Proposed Label
Back to Visual Analytics Dashboard	Step	Top left (navigation)	—	Keep	Back to Visual Analytics Dashboard
Last 365 Days	Step	Filters	Toggle state not explicit	Clarify that this control toggles the 365-day view on and off	365 Day View

- **UX best practice suggestion:** Replace the **Days** control with a clearly labeled time-range selector that allows users to switch between **Week**, **Month**, and **Year** views. A segmented toggle is recommended when space allows, as it keeps all options visible and reduces cognitive load.

[Table of Contents](#)

Screen 9: Parts Quotes (List)

Overview

- This screen is a list view that displays part quotes and their current status. It does not contain explicit call-to-action buttons. Users interact by clicking into individual line items to view details and understand the current status and next steps for each part quote.

CTA Audit Table – Parts Quotes

Current CTA (Exact)	CTA Type	Context	Issues	Recommendation	Proposed Label
Row click (implicit)	Step	Quote list items	Action is implicit	Make behavior explicit in audit	N/A

Screen 10: Part Quote Detail Page

Overview

- This page displays the details and current status of a single part quote selected from the Parts Quotes list. From this view, users can review quote status and related event information, edit associated asset information, print the quote, decline the quote, and, when the quote is in the Quoted queue, add the item to the cart to proceed with purchase.

CTA Audit Table – Part Quote Detail

Current CTA (Exact)	CTA Type	Context	Issues	Recommendation	Proposed Label
Back to Parts Quotes	Step	Top left (navigation)	—	Keep	Back to Parts Quotes
Edit	Step	Asset section	—	Keep	Edit
Print Quote	Actionable	Quote actions	Verb–subject compliant	Simplify	Print
Decline Quote	Actionable	Quote actions	Destructive action	Simplify	Decline
Attachments (#)	Step	Right of quote data	Inline count	Keep	View Attachments

			indicator		ts (#)
Notes (#)	Step	Right of quote data	Inline count indicator	Keep	View Notes (#)
Add to Cart	Actionable	Quote actions	Verb–subject compliant	Keep	Add to Cart

- Short CTAs like **“Submit”**, **“Save”**, or **“Done”** are industry standard.

[Table of Contents](#)

Screen 11: Approvals (Card View)

Overview

- This screen presents items requiring approval decisions, giving users visibility into pending approvals and enabling them to review details, evaluate options, and take appropriate approval actions within the same workflow.

CTA Audit Table – Approvals

Current CTA (Exact)	CTA Type	Context	Issues	Recommendation	Proposed Label
View Details	Actionable	Approval card (card view)	Approved exception	Keep	View Details
Other Buying Options (#)	Step	Approval card footer (next to actions)	Inline count indicator	Change to match (My Dashboard)	(#) Options
Reject	Actionable (Destructive)	Approval card	Destructive action	keep	Reject

Purchase	Actionable	Approval card	Verb–subject compliant	Keep	Purchase
----------	------------	---------------	------------------------	------	----------

- Short CTAs like “**Submit**”, “**Save**”, or “**Done**” are industry standard.

[Table of Contents](#)

Screen 12: Exchanges & Returns (Card View)

Overview

- This screen manages exchange and return workflows, providing users with visibility into return status, tracking information, and required actions. From this view, users can enter tracking details, print return labels and documents, and monitor progress, helping ensure returns and exchanges are completed accurately and on time.

CTA Audit Table – Exchanges & Returns

Current CTA (Exact)	CTA Type	Context	Issues	Recommendation	Proposed Label
View Details	Actionable	Return item card	Approved exception	Keep	View Details
Enter Tracking #	Actionable	Return items	Symbol in label	Make the object explicit.	Add Tracking
Print Label & Documents	Actionable	Return items	Object generic	Make object explicit	Print Label

[Table of Contents](#)

Platform CTA Standards (Proposed)

This section translates audit findings into **clear, reusable CTA rules** that can be applied across PartsSource.

1. CTA Verb Taxonomy (Approved Verbs)

Use verbs intentionally based on user intent and risk level.

Intent Type	Approved Verbs	When to Use	Avoid
Navigate / Explore	View, Open, Explore	Dashboards, cards, tables	See, Show, More
Review / Evaluate	Review, Compare, Inspect	Quotes, approvals, analytics	Info
Take Action	Add, Enter, Submit, Schedule	Forms, carts, service requests	Continue, Proceed
Commit / Purchase	Purchase, Place Order, Checkout	Final steps only	Add (when committing)
Destructive	Remove, Decline, Delete	Must signal risk	X icon only

[Table of Contents](#)

2. Risk Signaling Rules

Risk Level	CTA Requirements
Low	Standard verb + object (View Details)
Medium	Verb + outcome clarity (Review Quote)

Rules

- Never pair a high-risk CTA next to a primary CTA without visual and language separation.
 - Destructive CTAs must never be icon-only.
-

CTA Do / Don't Appendix (Design & Product Reference)

This appendix is designed to be **quick to scan, easy to apply, and safe to standardize**. It can be shared independently with designers, product managers, and engineers.

PartsSource Naming Best Practices (Audit Rules)

These rules govern **how CTAs are evaluated throughout this audit**. They are not findings and are not up for debate within individual screens.

Rule:

CTAs should follow **Verb–Subject** (e.g., “Download Report”, “Submit Form”) to align with user mental models, improve scannability, and reduce cognitive load.

Approved Exceptions (Do Not Flag):

- Edit
- Back
- Cancel
- Submit
- Save
- Print
- View Details

** Short CTAs like “**Submit**”, “**Save**”, or “**Done**” are industry standard.*
